# Page 1 – Home

The home page displays two buttons:

- “Medications with prescription”
- “Medications without prescription”

The user selects based on their needs.

[Table of Contents](#)

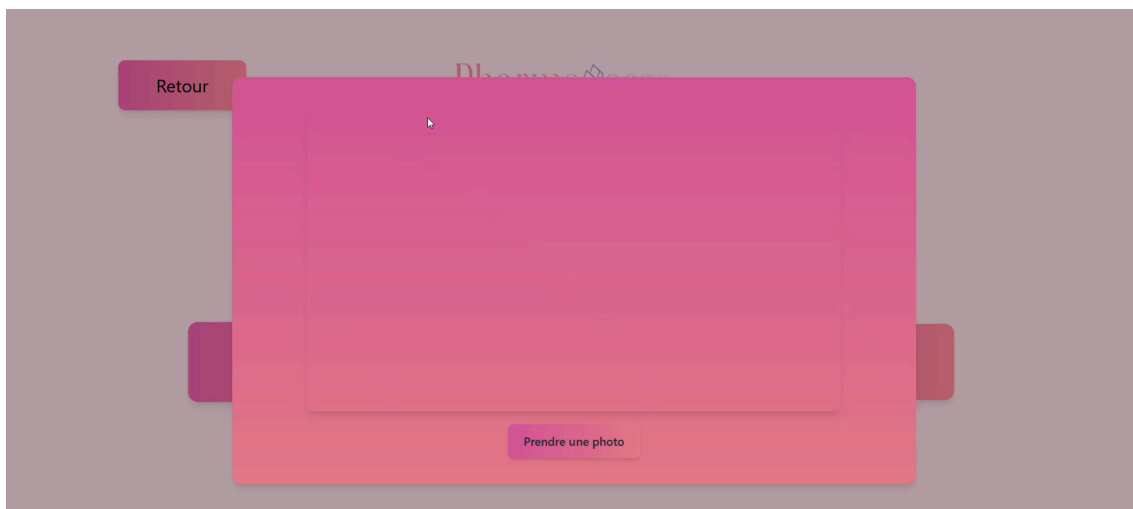

## Page 2 – Medications with Prescription

After choosing "with prescription", the user is prompted to:

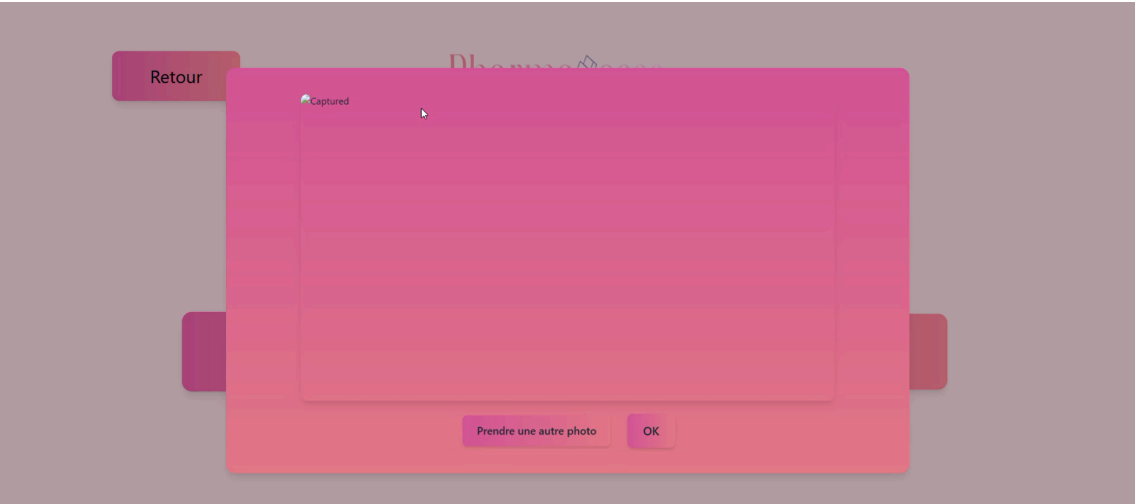

- Scan their prescription
- Scan their health card
- Scan their ID card

Each action opens a pop-up asking firstly to take the picture.

Then to confirm the image or retake it after preview.

## Page 3 – Medications without Prescription

Upon selecting "without prescription", a list of medications appears.

Available features:

- Scroll through the list
- Apply filters:
  - Medications from A to G
  - Medications from H to P
  - Medications from Q to Z
  - Anti-inflammatory only
  - Painkillers only

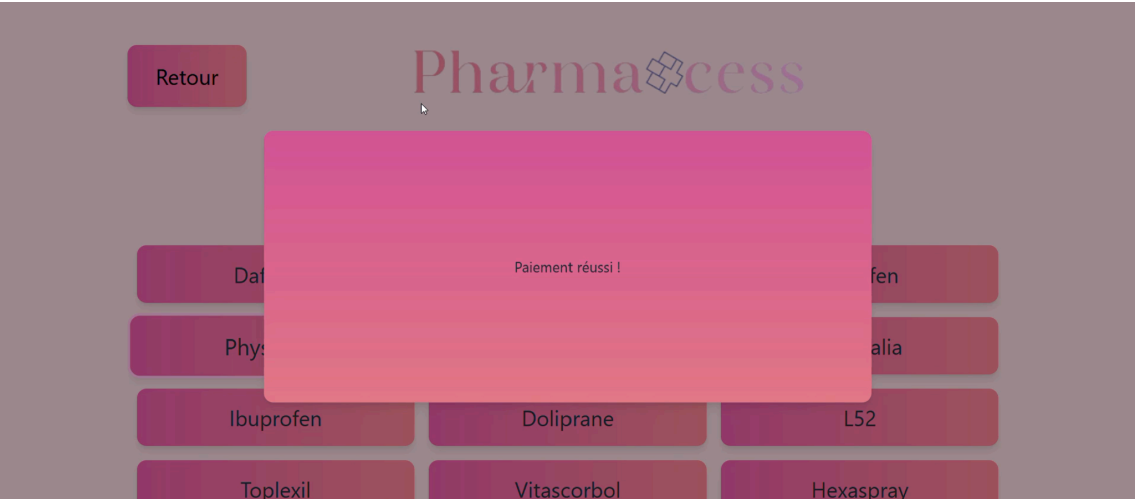

Clicking on a medication shows:

- Stock availability
- Pay button

If stock is available, a message confirms the **\*\*payment was successful\*\***.

## Page 4 – Failed Payment

If no stock is available, the user sees this message:

> "Payment failed. Would you like to try again or cancel the transaction?"

Two buttons are shown:

- "Try again" → Returns to the previous page
- "Cancel order" → Returns to the home page
